

With the government failing and unable to take action on the greatest issue facing our planet, climate chaos, we have to create a grass roots solution.

A week long camp in the North of England will take place from the 26th August to the 4th September. We aim to bring together thousands of people to take action against climate change, and share and live practical solutions.

Everyone is invited to get involved and start organising NOW! There will be a public meeting 11am - 6pm, 14th Jan at Bridge 5 Mill, 22a Beswick St, Manchester, as the first step in this process.

Accommodation is available if you contact us in advance. Please also contact us about any access, dietary or creche needs. For directions to Bridge 5 Mill see www.bridge-5.org/map.htm The next meeting will be on the 11th and 12th February, for more details check out our website.
